

The Energy Free Racing Association is a Bisbee-based group founded in 1978 to improve the quality of coaster racing and to promote Bisbee's most unique annual event. It has been and is our goal to work diligently to develop support, spirit and a good relationship within the community. The foundation upon which we are building is written in the history of a town whose Independence Day celebrations have always been great events. With this our Centennial Year, beginning July 4th, 1980 and continuing through July 4th, 1981, EFRA hopes to further this dedication.

This year's race will feature the most sophisticated field of coasters to date. Advancement in coaster design technology has necessitated new regulations that will enable us to not only produce a *faster*, more *exciting* race for the drivers and the spectators, but also a *SAFER* program overall. However, as the degree of performance is increased, so is the degree of *DANGER*. In order to protect our drivers, we ask that they abide by specific safety standards and have their coasters pass a safety inspection. To protect you, our spectators, we ask that you *PLEASE* stay off the race course!

This Program-Directory was designed to promote Bisbee as a community rich with historical character and unique annual events. This Independence Day 1980 is only the beginning of our Centennial Celebration. We hope you will take this program home as a reminder of all the upcoming activities.

ENERGY FREE RACING ASSOCIATION
